

DOCTOR PRESCREVE — MASTER PANEL SPECIFICATION

Painel Médico Operacional + Integração Memed

Versão Técnica Oficial — v1.0

1. SYSTEM OVERVIEW

Project Name: Doctor Prescreve

System Type: Medical SaaS Platform for asynchronous telemedicine, prescription renewal and digital prescription workflow.

Primary Goal: High-performance operational medical dashboard integrated with Memed digital prescription engine.

Core Principles:

- Low cognitive load
- Fast clinical workflow
- Minimal clicks
- Real-time operational flow
- Clean enterprise medical interface
- LGPD-oriented visual identity
- Prescription-centered workflow
- Desktop-first experience

The interface MUST NOT resemble:

- Legacy hospital systems
- ERP administrative dashboards
- Financial dashboards
- Overloaded SaaS products
- Neon/futuristic interfaces

The interface MUST resemble:

- Modern healthtech
 - Enterprise medical platform
 - Operational medical workflow center
 - Premium minimalistic medical software
-

2. OFFICIAL TECH STACK

Frontend:

- Next.js 15
- React 19
- TypeScript
- TailwindCSS
- Shadcn/UI
- Framer Motion (minimal animations only)

State Management:

- Zustand

Backend:

- Supabase
- PostgreSQL
- Edge Functions

Authentication:

- Supabase Auth
- JWT session
- Protected Routes

Integrations:

- Memed SDK
- WhatsApp Cloud API
- SMTP email service
- SMS provider

Infrastructure:

- Railway
- Vercel

Security:

- Row Level Security (RLS)
 - Session validation
 - Protected medical routes
 - Audit logs
 - HTTPS only
-

3. DESIGN TOKENS

COLORS

```
export const colors = { primaryBlue: '#1557FF', lightBlue: '#EEF4FF', gold: '#F4B000', green: '#0BA84F',  
danger: '#FF2D2D', background: '#F8F AFC', white: '#FFFFFF', textPrimary: '#1E1E1E', textSecondary:  
'#5B6475', border: '#E5EAF2', softPink: '#FADADA' }
```

BORDER RADIUS

```
export const radius = { card: '20px', button: '14px', badge: '12px', input: '14px' }
```

SHADOWS

```
export const shadows = { card: '0 4px 14px rgba(0,0,0,0.04)', hover: '0 8px 24px rgba(0,0,0,0.06)', button:  
'0 2px 8px rgba(0,0,0,0.06)' }
```

TYPOGRAPHY

Primary Font: Inter

Fallback:

- Poppins
- SF Pro

Rules:

- Titles: Bold
 - Labels: SemiBold
 - Content: Regular
 - Avoid excessive font weights
 - Avoid gradients
 - Avoid decorative fonts
-

4. PROJECT STRUCTURE

```
/app /components /components/dashboard /components/patient /components/prescription /  
components/ui /hooks /services /services/memed /services/whatsapp /store /types /lib /utils /styles
```

5. GLOBAL STATE MACHINE

```
export enum PatientFlowState { TRIAGED = 'TRIAGED', QUEUE = 'QUEUE', UNDER_REVIEW =  
'UNDER_REVIEW', MEMED_PROCESSING = 'MEMED_PROCESSING', AWAITING_VALIDATION =  
'AWAITING_VALIDATION', VALIDATED = 'VALIDATED', DELIVERED = 'DELIVERED', FINISHED = 'FINISHED',  
REJECTED = 'REJECTED' }
```

6. MAIN OPERATIONAL FLOW

1. Patient completes chatbot triage
 2. System validates eligibility rules
 3. Patient enters QUEUE column
 4. Doctor clicks "ATENDER"
 5. Medical record screen opens
 6. Doctor reviews patient data
 7. Doctor clicks "APROVAR"
 8. Payload sent to Memed
 9. Memed generates prescription
 10. Patient moves to "EM ATENDIMENTO"
 11. Doctor validates generated prescription
 12. Doctor clicks "ACEITAR RECEITA"
 13. Prescription saved to patient medical record
 14. Patient moves to "RECEITAS PRONTAS"
 15. Doctor sends prescription via WhatsApp/email/SMS
 16. Delivery confirmation displayed
 17. Patient marked as DELIVERED
-

7. LOGIN SCREEN SPECIFICATION

COMPONENT

<LoginScreen />

LAYOUT

Two-column layout.

Left Side:

- Branding
- Institutional content
- Medical image background

Right Side:

- Login card
 - Credential form
-

LEFT SIDE CONTENT

Logo Position: Top-left.

Logo: Use official Doctor Prescreve logo provided by Dr. Max Matos.

Background: Soft blurred medical image.

Image style:

- clean
- premium
- hospital-grade
- white/light blue tones

Main Text: "Sua plataforma completa para prescrição e atendimento médico"

Supporting Features:

- Segurança e privacidade
- Atendimento eficiente
- Tudo em um só lugar

Each feature contains:

- circular blue icon
 - title
 - supporting description
-

LOGIN CARD

Properties:

- white background
- rounded corners
- soft shadow
- minimalistic

Contains:

- email/cpf input
- password input
- remember me checkbox

- forgot password link
 - primary login button
-

LOGIN BUTTON

<ButtonLogin />

Properties:

- background: primaryBlue
- text: white
- full width
- medium height
- subtle hover effect

Text: "ACESSAR PAINEL"

LOGIN SECURITY

Requirements:

- JWT authentication
 - Session persistence
 - Route protection
 - Secure cookie
 - HTTPS only
 - Logout invalidates session
-

8. MAIN DASHBOARD SCREEN

COMPONENT

<MedicalDashboard />

STRUCTURE

Header GoldDivider ThreeOperationalColumns Footer

9. HEADER COMPONENT

<ComponentHeader />

LEFT

Official logo.

CENTER

Medical Record Button.

Properties:

- white background
- black border
- black icon
- subtle shadow

Text: "PRONTUÁRIO"

MEMED STATUS BADGE

`<MemedStatusBadge />`

Properties:

- white background
- green indicator dot
- subtle border

Text: "Certificado digital conectado (Memed)"

Function: Indicates active prescription integration.

MEDICAL PROFILE

Circular avatar.

Displays:

- doctor initials
- doctor name
- specialty

Example: DR. MAX MATOS Médico Cirurgião

LOGOUT BUTTON

Properties:

- soft pink background
- black icon
- black text

Text: "SAIR"

10. GOLD DIVIDER

Horizontal gold line below header.

Purpose: Visual identity separator.

Height: 4px approximately.

11. MAIN DASHBOARD COLUMNS

Dashboard contains 3 equal columns.

Each column:

- white card background
 - rounded corners
 - soft shadows
 - internal vertical scroll
 - same visual language
-

12. COLUMN 1 — FILA DE ESPERA

`<ComponentQueueColumn />`

HEADER

Contains:

- blue clock icon
- title
- patient count badge

Title: "FILA DE ESPERA"

Badge: soft pink background black text

PATIENT CARD

<ComponentQueueCard />

Contains:

- patient avatar
 - patient initials
 - medical record id
 - waiting time badge
 - WhatsApp contact
 - ATENDER button
-

WAITING BADGE

Properties:

- light blue background
- black text
- rounded corners

Example: 7h 58min

WHATSAPP CONTACT

Green WhatsApp icon.

Text: "Contato paciente"

Action: Open WhatsApp conversation.

BUTTON — ATENDER

<ButtonAttend />

Properties:

- blue background
- white text
- rounded corners
- reduced width
- aligned right

- same size standard as other operational buttons

Action: Open medical record screen.

State Transition: QUEUE -> UNDER_REVIEW

13. COLUMN 2 — EM ATENDIMENTO

<ComponentUnderReviewColumn />

Purpose: Patients with prescription generated by Memed awaiting final doctor validation.

HEADER

Contains:

- blue medical icon
- title
- count badge

Title: "EM ATENDIMENTO"

CARD STRUCTURE

Contains:

- avatar
 - initials
 - record id
 - validation badge
 - visualize button
 - accept button
-

VALIDATION BADGE

Text: "Aguardando validação"

Properties:

- gold background
 - rounded corners
 - subtle shadow
-

BUTTON — VISUALIZAR RECEITA

<ButtonViewPrescription />

Properties:

- white background
- black border
- black text

Function: Open generated Memed prescription preview.

Action: viewPrescription()

BUTTON — ACEITAR RECEITA

<ButtonAcceptPrescription />

Properties:

- gold background
- white text
- rounded corners

Function: Final medical validation.

Action Sequence: 1. Confirm prescription 2. Save prescription data 3. Save PDF 4. Save audit log 5. Move patient to VALIDATED state 6. Move card to RECEITAS PRONTAS column

State Transition: AWAITING_VALIDATION -> VALIDATED

14. COLUMN 3 — RECEITAS PRONTAS

<ComponentReadyPrescriptionColumn />

Purpose: Validated prescriptions awaiting delivery.

HEADER

Contains:

- green check icon
- title
- count badge

Title: "RECEITAS PRONTAS"

CARD STRUCTURE

Contains:

- avatar
 - initials
 - record id
 - validated badge
 - WhatsApp button
 - email button
 - SMS button
-

VALIDATED BADGE

Text: "Receita validada"

Properties:

- light green background
 - green text
 - rounded corners
-

BUTTON — ENVIAR POR WHATSAPP

<ButtonSendWhatsApp />

Properties:

- green background
- white text
- centered
- rounded corners

Action: Send prescription via WhatsApp API.

BUTTON — ENVIAR POR E-MAIL

<ButtonSendEmail />

Properties:

- white background

- black border
- black text

Action: Send prescription PDF via email.

BUTTON — ENVIAR POR SMS

`<ButtonSendSMS />`

Properties:

- white background
- black border
- black text

Action: Send prescription link via SMS.

DELIVERY FEEDBACK

After successful delivery:

Display toast notification.

`<ToastSuccess />`

Text: "Envio concluído"

Properties:

- top-right position
- auto-dismiss
- soft animation
- non-blocking

After delivery: Card fades out and leaves queue.

State Transition: VALIDATED -> DELIVERED

15. FOOTER

`<ComponentFooter />`

Contains:

- LGPD icon
- platform text

- CNPJ
- copyright

CNPJ: 50.871.173/0001-53

LGPD Text: "Ambiente protegido LGPD" "Dados protegidos e criptografados"

16. MEDICAL RECORD SCREEN

<ComponentMedicalRecord />

Purpose: Clinical validation screen.

17. MEDICAL RECORD HEADER

Contains:

- Back button
- Page title
- Doctor profile
- Logout button

Title: "PRONTUÁRIO MÉDICO"

Subtitle: "Avalie as informações do paciente e aprove o atendimento"

18. ELIGIBILITY BANNER

<EligibilityBanner />

Green success banner.

Text: "Paciente triado com sucesso pelo chatbot. Todos os critérios atendidos."

Status Badge: "VERIFICADO"

19. LEFT COLUMN — PATIENT DATA

<ComponentPatientData />

Contains:

- initials avatar
- age
- record number
- WhatsApp
- birth date
- CPF
- email
- phone
- address
- postal code

Title: "DADOS DO PACIENTE"

No icon in title.

20. RIGHT COLUMN — MEDICAL HISTORY

<ComponentMedicalHistory />

Contains:

- clinical blocks
- prescription attachment
- edit button

Title: "HISTÓRIA CLÍNICA"

No icon in title.

21. BUTTON — RECEITA ANEXADA

<ButtonAttachedPrescription />

Properties:

- white background
- black border
- black icon
- black text

Function: Open attached prescription image uploaded by patient.

22. BUTTON — EDITAR

`<ButtonEditMedicalRecord />`

Properties:

- white background
- black border
- reduced visual emphasis

Function: Enable medical record editing.

23. CLINICAL BLOCKS

All blocks:

- white background
- rounded corners
- subtle borders
- black icons
- light blue icon containers

Blocks:

- Queixa Principal
 - Histórico Clínico
 - Exame Físico
 - Alergias
 - Medicações em Uso
 - Conduta Médica
-

24. OPTIONAL MEDICAL NOTES

`<ComponentOptionalNotes />`

Textarea field.

Placeholder: "Digite aqui orientações adicionais, observações ou justificativas (opcional)..."

25. BUTTON — REPROVAR

`<ButtonReject />`

Properties:

- red background
- white text
- rounded corners

Text: "REPROVAR"

Subtitle: "Não autorizar atendimento"

Action: Reject consultation.

State Transition: UNDER_REVIEW -> REJECTED

26. BUTTON — APROVAR

<ButtonApprove />

Properties:

- green background
- white text
- rounded corners

Text: "APROVAR"

Subtitle: "Autorizar atendimento"

Action Sequence: 1. Validate medical record 2. Save approval log 3. Send payload to Memed 4. Generate prescription request 5. Move patient to MEMED_PROCESSING

State Transition: UNDER_REVIEW -> MEMED_PROCESSING

27. MEMED INTEGRATION SPECIFICATION

REQUIRED

Embedded mode.

Minimum dimensions:

- min-width: 820px
 - min-height: 700px
-

REQUIRED MEMED EVENTS

prescricaoImpressa

Capture:

- PDF
 - prescription ID
 - medications
 - doctor signature
 - timestamp
 - protocol
-

REQUIRED FEATURES

Enable:

- forceSign
- allowShareModal
- enableAlerts
- historyPrescription
- setPatientAllergy
- showProtocol

Disable:

- guidesOnboarding
 - dropdownSync
-

REQUIRED FLOW

setPaciente() MUST execute before opening prescription interface.

28. MINIMUM SECURITY REQUIREMENTS

Mandatory:

- JWT authentication
- Session validation
- Route protection
- RLS enabled
- HTTPS only
- Audit logs
- User-based access
- Secure logout

- Expiration handling
-

29. USER EXPERIENCE RULES

Avoid:

- aggressive modals
- excessive animations
- visual overload
- blinking elements
- neon effects
- dashboard charts

Focus:

- operational speed
 - readability
 - low fatigue
 - fast workflow
 - clean interface
-

30. MICRO INTERACTIONS

CARD HOVER

Very subtle hover effect.

Behavior:

- elevate 2px
- shadow increase 5%
- transition 0.2s

Purpose: Premium interaction feedback.

BUTTONS

Subtle hover.

No exaggerated animations.

TOASTS

Minimal. Non-intrusive. Fast fade-out.

31. RESPONSIVENESS

Priority: Desktop-first.

Supported:

- Desktop
 - Notebook
 - Horizontal tablet
-

32. FINAL PRODUCT GOAL

Doctor Prescribe MUST visually communicate:

- modern medicine
- operational efficiency
- enterprise reliability
- healthtech sophistication
- low-friction workflow
- prescription automation
- legal safety
- premium experience

The interface MUST remain:

- clean
- fast
- intuitive
- scalable
- medically oriented
- operationally efficient
